PROFILE

Interdisciplinary undergraduate combining Medical Laboratory Science with full-stack software development, data and AI workflows, project management, graphic design and scientific communication. Builds digital products independently while developing a scientific foundation at KolaDaisi University, Ibadan; interested in the intersection of healthcare, technology, research, data and visual communication.

PROFESSIONAL EXPERIENCE

Scientific Researcher — KolaDaisi University, Ibadan

Oct 2024 – Present · Hybrid

Combines hands-on Medical Laboratory Science training with scientific inquiry and research-oriented learning.

- Explores biomedical questions through structured scientific reading, evidence-aware reasoning and documentation.
- Connects laboratory science with emerging technology, healthcare and scientific communication.

Project Manager — KolaDaisi University, Ibadan

May 2025 – Aug 2026

Coordinates project ideas and delivery across multidisciplinary work.

- Plans work, organizes milestones and supports iterative execution from concept to deliverable.
- Applies product thinking, communication and problem-solving across creative and technical projects.

Graphic Design Specialist — KolaDaisi University, Ibadan

Oct 2024 – Aug 2026 · Hybrid

Creates visual communication materials for the institution.

- Applies composition, typography, visual hierarchy and design thinking to institutional communication.
- Develops graphics and presentation-oriented assets for clear audience communication.

Graphic Design Specialist — KolaDaisi University Interdenominational Chapel

Oct 2024 – Present · Hybrid

Develops visual communication for chapel activities and events.

- Creates event and communication graphics while maintaining coherent visual presentation.
- Translates messages and announcements into audience-focused visual materials.

TECHNICAL & SCIENTIFIC COMPETENCIES

Software & Web: React, TypeScript, JavaScript, Next.js, Node.js, Express, Vite, Tailwind CSS, HTML/CSS, responsive UI development

Backend & Data: Supabase, PostgreSQL, Row-Level Security, Supabase Realtime, MongoDB, Firebase, REST APIs

Cloud & Engineering: Git/GitHub, Vercel, Terraform, Google Kubernetes Engine (GKE), Playwright, debugging and deployment workflows

Design & Visual: Graphic design, UI/UX, visual identity, layout, typography, presentation design, scientific and biomedical visualization

AI & Data: AI-assisted development workflows, prompt engineering, data exploration, interpretation and visualization concepts

Science: Medical Laboratory Science, physiology, pharmacology, anatomy, diagnostics fundamentals, scientific communication

SELECTED PROJECTS

UNI-SPACE — Full-Stack Social Platform for Nigerian University Students

- Independently designed and built a full-stack platform using React, TypeScript, Vite, Tailwind CSS and Supabase.
- Designed the Supabase database schema and Row-Level Security policies and completed an RLS performance-optimization pass.
- Built real-time messaging, feeds, communities, moderation/privacy tooling, an interactive Leaflet/OpenStreetMap social map and PWA support.
- Developed the platform through multiple iterative phases toward a mature, near-production state.

PROFESSIONAL EXPERIENCE — CONTINUED

Technical Support Specialist — KolaDaisi University Interdenominational Chapel

Oct 2024 – Jun 2026 · On-site

Provided technical and audio-visual support for chapel operations.

- Supported presentations, media workflows and on-site technical needs.
- Helped maintain reliable digital and audio-visual delivery during activities.

Senior Data Analyst — HNG Tech

Internship

Data-focused internship experience.

- Applied data-oriented thinking and analytical workflows within a professional technology environment.

SELECTED PROJECTS — CONTINUED

Tolyawekka — Marketing Website — UK Neighbourhood-Sharing App

- Delivered multiple rounds of front-end fixes and enhancements on a live marketing website.
- Resolved SVG icon-sprite and mobile-navigation issues and used Playwright to debug responsive horizontal overflow.
- Built interactive form and UI enhancements.

Personal Portfolio — 13-page HTML/CSS/JavaScript portfolio

- Designed and built the site in pure HTML, CSS and vanilla JavaScript and deployed it on Vercel.
- Created an original interactive “Strange Stack” node-connection visualization for the expertise page.

Meed University — Global Social Learning Platform — In Development

- Architected a nine-phase development plan for a social learning platform for university students and corporate teams.
- Planned React/TypeScript/Vite frontend, Node.js/Express/MongoDB backend and Terraform-to-GKE deployment.

EDUCATION

Medical Laboratory Science (B.MLS) — Undergraduate

KolaDaisi University, Ibadan, Nigeria

CERTIFICATIONS

13 Coursera certifications across technology and professional development.

VOLUNTEER EXPERIENCE

One African Child — Volunteer | Green Aware Foundation — Volunteer | Twayne — Volunteer

RESEARCH & PROFESSIONAL INTERESTS

Artificial intelligence in healthcare and diagnostics; biomedical data and scientific visualization; laboratory medicine and diagnostic systems; digital health; neuroscience and neurotechnology; biomechatronics and human-machine interaction; creative technology for education and public communication.

CREATIVE WRITING & COMMUNICATION

Literary fiction and long-form creative writing; scientific writing, educational explanation and public-facing communication.
